EMPLOYMENT «

Feb 2016 to Current

PENNYPOST   Seattle, WA
Front-end Web Developer
Developing the PennyPost website and promotional pages as part of the front-end team, working mostly on front-end in Angular.js and a little work on the Node.js back-end. Responsible mostly for user interactivity and animation as well implementing UX and design considerations.

Jul 2015 to Sep 2015

GENERAL ASSEMBLY   Seattle, WA
Web Developer
Full-time immersive web development program.
MEAN stack and Ruby on Rails development.
80+ combined hours per week, lecture, lab, project and homework time.
Specialization in full-stack web development

Oct 2015 to Dec 2015   Seattle, WA

Teaching Assistant
Assisted students during homework and assignments.
Worked with Instructional team to give them feedback on students who are excelling and struggling to help them adjust lesson plan for the class.
Spent one-on-one time with students to help them further understand the concepts.

Nov 2015 to Feb 2016   Seattle, WA

Developer In Residence
As part of the Instructional Staff I was in charge of creating the weekly code quiz, creating informational webpages for student resources, assisting the students with homework and projects, providing one on one feedback on student progress, monitoring classroom moral, and attendance.

Feb 2010 to Dec 2015

TRADER JOE'S   Bellevue & Issaquah, WA
Crew Member
In charge of merchandising, ordering, and managing inventory for multiple sections of the store.
Helped lead the customer wine/beer tasting.
Trained new employees on customer service, POS machines and ordering.
